1. Do you pay attention to advertisements that are on television or web pages?
2. What kind of advertisement is effective in reaching you?
3. Consider that about 200 years ago was a preindustrial age. The concept of household was very different then. Considering our modern economies (industrial and otherwise) how has the concept of household changed, such that, we don't understand God's concept of household like we once might have?
4. In chapter 1:3-6, God's economy (stewardship/administration) is by faith. With what is stewardship by faith contrasted and how does that help define stewardship (oikonomia – house law/good order) by faith?
5. How does this apply and give insight into the life of a man who has managed his household (chapter 3:5)?
6. Does departing from the faith lead to error in doctrine or vice versa?
7. Demonic lies are subtle. Do you think we are still affected by lies that lead to error in doctrine and affect the concept of household?
8. Are we in danger of being led away from the faith?
9. Think about how deceitful spirits may be influencing your family.
